## **T?H?E end of school!**

**I have a lot to talk about how crazy this school year is. I mean, with covid that is pretty bad but how it is causing people to stress. It is just outrageous.**

### **1. School homework**

**This year there was no homework and I am happy about that though there are two downsides. One, I can't practice. Two: we had DIP so that is not good.**

### **2.Endgame**

**One of the best things about school years, is it ends with a kickball game (in my opinion) and some classes even get gifts!**

### **3. #classes**

**I had one of the best classes and it's been a really good school year  
EVEN WITH COVID (but without my friends backstabbing me)**

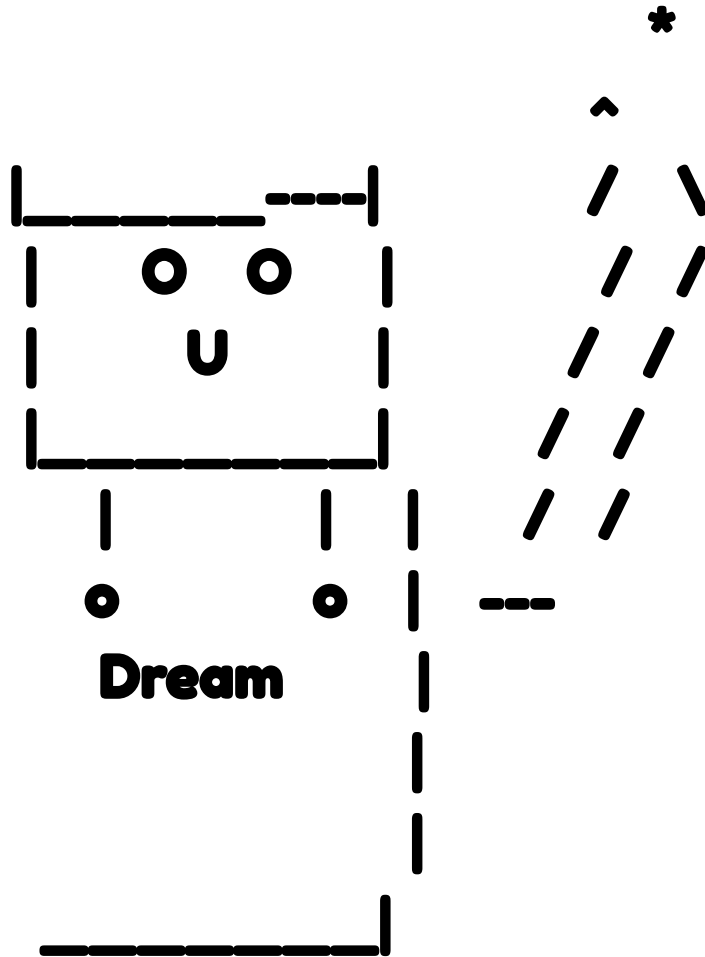

**Anyway, it was an awesome class

# Minecraft top 5 tips and advice (and just some stuff to know)

- 1. In the new 1.17 update, there are a bunch of new mobs! There is also glow stuff. (for instance, the glow squid) But one of the most fascinating new creatures is the axolotl. To tame it, you have to scoop it up in a bucket, and then if you release it. It can attack hostile mobs!**
- 2. In a swamp, find a clay patch, then mark the center of it (have chunk borders enabled) then go to the middle of the clay patch and turn on coordinates (with f3) then move 7 steps and check the positive set is increasing, then once that's done, dig straight down and BOOM! Diamonds! (note: this might not work in 1.17)**

3. If you're having trouble completing the "bullseye!" advancement, have no fear! This is how to complete it with a "hack." 🐱 So you need a elytra for this, some bushes, a bow and arrow (duh) and a flint and steel. So place 1 bush on the target, then continue to put four or so more bushes connecting to the first bush. Then, shoot the bush on top of the bullseye thingy from the top. Get your fireworks and elytra ready, then, burn the leaf farthest away from the bullseye, then, fly away.
4. Are you sick of coal burning away? Well, lava buckets are a great fuel, burning up to 1000 seconds! Wow! But if you're trying to do a nether survival and you don't have iron to make a bucket, use blaze rods! Even though they're not the best, you can still use 'em
5. Endermans sure can do a lot of damage to you, right? Well, there's a simple way to make them not see you. Simply put on a pumpkin mask. And as long as you don't hit them, they won't see you.

# The avatar, part 1, characters

## 1. Avatar Aang

**When Aang grew up until he was at the age of 12 he received word from the monks that he was the- avatar, he was a great airbender, but since he was the avatar, the other kids thought that he was too powerful to play any games. (so the kids obviously banned him from playing) He of course was the one defeating the firelord**

## 2. Katara

**Katara is the only waterbender (currently) in the south pole. (other than Hama) She eventually marries Aang and becomes a very powerful waterbender. Her mom died when she was very little and played an important role in helping Aang in his quest to defeat the fire lord.**

### **3. Sokka**

**Sokka is Katara's brother, but unlike his sister, he can't bend. What Sokka lacks in no bending, he makes up for his skill in weapons and fighting. Sokka was a very funny member of team avatar and he made a meteorite blade. (really cool, right?) Sokka is the oldest member of team avatar (before Zuko joined) and helped greatly to beat the fire nation**

## 4. Zuko

**Zuko is crown prince of the fire nation and becomes firelord. He was originally evil, chasing the avatar to “restore his honor,” but he eventually switched sides and became a part of team avatar. He dueled in an agny-cia against his sister, Azzula, during Sozin’s Comet. He also taught Aang firebending**

# Toph

**Toph Beifong is the blind earthbender of team avatar and is probably the best earthbender in the world. She uses vibrations to see the world around her and she taught Aang earthbending. She calls Aang “twinkle toes” (and does the same to Korra). She played a vital role in defeating the firelord and invented metalbending.**
